

## Summary of restrictive practices

<b>Service:</b>	
-----------------	--

<b>Sections A and B completed by:</b>		<b>Date:</b>
<b>Sections C and D completed by:</b>		<b>Date:</b>
<b>Present and restrictive practices review meeting</b>		<b>Date:</b>

Having completed the *list of restrictive practices* form at the service team meeting, the RRP Practitioner should complete sections A and B and forward to the service's manager, copied to relevant senior manager.

The service's manager should complete sections C and D and return to RRP Practitioner, prior to the restrictive practices review meeting.

At the restrictive practices review meeting, section E should be completed.

If the restriction meets the criteria it can be part of the client's planned support and recorded in the support plan.

If the restriction doesn't meet the criteria it may be possible to agree to simply remove the restriction in which case section G should be completed. If it is not possible to remove the restriction, the meeting should discuss what actions can be taken to reduce the restriction and these should be recorded in section F.

Actions in section F should be kept under regular review by the service's manager and relevant senior manager until the restriction either meets the criteria (at which stage section E should be completed and dated) or is removed (at which stage section G should be completed).
